

# MANAGED SOLUTIONS FOR STATE EMERGENCY OPERATIONS

## CHALLENGE

Federal agencies and state, local and tribal governments require vendor-supported supplies, services, and procurement processes that serve the anticipated needs of resource demands for emergency response operations.

Costs for delivering medical care and social services are also increasing. While healthcare and targeted case management services are often needed for the homeless, immigrants and displaced persons, access to care is being hampered by a shortage of primary care physicians, nurses and other healthcare-related personnel.

Not only is there a shortage of caregivers, the engagement, processing, and allocation of available and appropriate resources is inconsistent.

## SOLUTION

The Acuity Care team has a long history of providing medical and emergency response services. Our managed solutions deliver high-capacity, just-in-time and multi-disciplinary levels of care for varied populations and complex logistical issues.

We enable mission continuity and stability for government and enterprise organizations. Our medical care, integrated logistics and managed solutions are field-tested and proven providing life support resources and accommodations.

From natural or man-made disasters or urgent medical needs, we have the ability to rapidly deploy and respond delivering flexible and scalable services that seamlessly integrate with civilian teams, state emergency management personnel and government agencies.

## Adaptable, expandable, flexible & rapidly deployable

### High-quality, Cost-effective Care

Whether it's providing compassionate care or rapidly responding to disasters or emergencies, the Acuity team delivers quality, cost-effective care and support tailored to meet mission requirements.

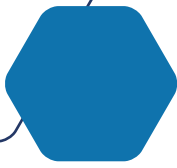

### Sufficient Capacity to Deploy

With proven experience in standing-up, staffing and managing state-licensed and emergency shelters, Acuity has responded to multiple locations including COVID operations in New York City and Texas, and provided medical care for front line border support.

### Secure Data Management

Our secure, cloud-based data management tools provide reporting flexibility and a data tracking solution that ensures enhanced security, efficiency, performance and projections for program management.

## Creating Stability for Those in Need

- **Comprehensive on-site solutions.** With over 48 years of experience providing medical care and emergency response services to numerous Government Agencies and commercial businesses, Acuity Care teams customize comprehensive on-site solutions to meet mission requirements and address sensitive cultural needs.
- **Medical and healthcare services.** Acuity Care teams provide primary healthcare, first aid, triage, resuscitation, stabilization, and remote case management for those who are displaced and located in refugee camps and/or emergency shelter facilities.
- **Emergency acquisitions and response operations.** Providing initial response and mission critical operations support, the Acuity team also supplies security, shelter, meals, water, sanitation, and logistics support.

## Sharing A Commitment to Your Mission

- **Disaster planning and managed solutions.** Providing sheltering, medical care, tactical operation needs and logistics support, Acuity's managed solutions and repeatable processes consistently yield positive and predictable outcomes.
- **Emergency response services.** Acuity supplies the turnkey program management expertise needed to stand-up, operate and manage shelter facilities.
- **State emergency management operations.** Acuity's total package solution is available under the Government Services Administration (GSA) as a Basic Operating Agreement (BOA), and is effective through 31 December 2026. Our supply chain experts assist planners in identifying supply chain disruptions that might impact the ability to respond to a major disaster.
