ACUITY CARE

Whether dealing with everyday health matters or an emergency no one saw coming, it's critical that organizations respond quickly with the appropriate level of care. That requires the right technology and infrastructure—and a partner that understands how to build them.

Acuity is that partner. Whether for occupational health, case management, disaster and emergency response, or other type of global health service—we give customers purpose-built frameworks and repeatable processes, so they're prepared to react quickly and efficiently. Our cost-effective, customizable, and flexible services address customers' most immediate needs and complex care requirements—wherever they are in the world.

ACUITY BUILD

Acuity makes even the most challenging construction work turnkey, repeatable, and efficient. Our experienced team of problem solvers build construction projects from the ground up and help our customers control scope, cost, schedules, and risks. And they ensure quality remains high with every brick and girder.

But we're about more than creating buildings. We work with government organizations to craft munitions response, mine action, and demilitarization programs in some of the world's most austere environments. Our purpose-built frameworks, repeatable processes, and commitment to innovation and high performance accelerate time to mission value for our clients, allowing them to build a foundation—whether physical or otherwise—to grow upon.

ACUITY SECURE

A government agency's workforce is its most valued asset and must be protected and secured—all the time, anywhere.

That's where Acuity comes in. We create customized, repeatable, and highly effective security programs that protect government and civilian employees in some of the world's most complex and hostile environments. Our technology-enabled solutions and purpose-built frameworks control scope, cost, and risk. They're designed by humans to protect humans—no matter where they are.
