

A Shared Commitment To Your Mission

The Acuity Case Management, Disaster and Emergency Response team has a long history of providing emergency response services. From natural disasters to immigration care, our infrastructure enables us to rapidly deploy and respond whenever and wherever needs arise.

With extensive emergency response experience, we provide the turnkey expertise needed to stand-up, operate and manage shelter facilities. Our repeatable processes consistently yield positive and predictable outcomes as program management teams supply high capacity, just-in-time and multi-disciplinary levels of care for dynamic population counts and complex logistical issues.

Our secure, cloud-based data management tools provide reporting flexibility and a single-source data tracking solution to ensure enhanced security, efficiency, performance and projections. These tracking tools provide on-demand access to occupant locations on site, and operate uniformly and with sufficient capacity to deploy to multiple locations including COVID-19 operations in New York City, alternate care sites in Texas, and frontline border support.

In addition, we stood-up and staffed six state-licensed shelters in Texas. Currently, we provide emergency shelter services and medical care at those facilities. We also stood-up operations and emergency shelter services for Long Beach, California within a 72-hour period.

Acuity understands and complies with all federal requirements for shelter services. Our performance has earned numerous "Exceptional" CPAR ratings from the U.S. Department of Health and Human Services and U.S. Department of Homeland Security.

About Acuity

Acuity International is a leading provider of process and technology-based medical, engineering, and mission services and solutions to government and commercial clients.
