

Delivering engineering insights to federal and commercial clients

Program & Construction Management

Ensure control of scope, cost, schedule, risk, and quality, on our clients' projects and programs

Expertise, Experience & Specialized Technology

We help by providing the right team of specialists

From initial planning to post-completion claims, or in response to accidents and natural disasters, Acuity provides independent, expert analysis and oversight to ensure control of scope, cost, schedule, risk, and quality, on our clients' most critical and complex projects and programs.

Clients

- Federal clients - Department of Defense, Department of Energy, Department of Veteran Affairs.
- Commercial clients - Insurance adjusters for large insurance losses, Architecture-Engineering Firms.
- International clients - Atomic Energy of Canada Limited, Australian Nuclear Science and Technology Organization.

Program Management

- Nearly 40 years of service experience. We have the team to back yours. Our services include project controls, forecasting, risk analysis, and process improvement.

Cost & Schedule Management

- Acuity's understanding of building construction, and major civil and environmental projects allows us to draw upon an expansive knowledge and talent base.

Claims Management

- Our services have been used by clients representing government agencies, contractors, insurers, owners and developers, and their attorneys.

Technology Solutions

- Our digital solutions power business applications and produce data insight using platform-based cloud technology.

1,400+ projects executed across 7 continents since 2014

\$ 100 B+ in projects estimated worldwide

About Acuity Program & Construction Management

Acuity's Program & Construction Management (P&CM) empowers our clients by blending strategy, technology, data, and advanced analytics. Our experts provide a comprehensive approach to planning, architecting, and implementing cutting-edge cloud technology and best-in-class consulting to drive operational efficiencies and deliver timely insights. We also offer specialized technology tools that support key processes vital to client missions.

Our specialists provide independent, expert analysis and oversight to ensure control of scope, cost, schedule, risk, and quality on our clients' most critical and complex projects. All of this is backed by an experienced team of in-house developers, product managers, and specialists who aim to provide results that are driven by innovation and performance. We empower clients by providing smart solutions that can optimize workflows, reduce costs, and provide repeatable results. Connect with a Program & Construction Management Specialist today.
