Base Operations & Facilities Management

Critical Infrastructure, Sustainment Supplies, and Equipment for Base Operations in Complex Environments

ACTIONS WITH PURPOSE, RESULTS THAT MATTER.

Introduction

Building your base is only the beginning; then comes operations and supply chain management, 24/7 oversight of operations and infrastructure, and an ongoing commitment to the health and security of your workforce. The larger the base, and the more inhospitable the environment, the tougher it is to ensure your operations will run smoothly.

Unless you turn to Acuity International.

Acuity offers a complete range of turnkey base operations services. Our experienced team of construction, communications, infrastructure, and supply chain managers assume the responsibility of ensuring bases are constructed and managed quickly, correctly, and continuously. Meanwhile, our physicians and nurses use cutting-edge expertise and equipment to ensure the health and safety of your employees in any and every location.

It's all part of Acuity's mission to provide you with everything you need to operate successfully and securely, anywhere in the world.

The Acuity Advantage

Acuity International's comprehensive and turnkey Base Ops services mix innovative technology with unparalleled expertise to successfully manage the construction, deployment, maintenance, and health of your facilities and workforce.

Our teams are skilled in virtually every aspect of base operations, including supply chain management, communications infrastructure, construction, health and human services, and more. They take the management of base operations out of your hands, so your organization can focus on what's most important: achieving your mission objectives.

What's more, our teams operate in every environment, including some of the world's most austere locations. We go where most companies cannot—or will not—venture to provide you with functional, sustainable, and safe facilities.

Our Services

Supply Chain & Property Management

Unknown factors can easily interrupt supply chain networks and impact the flow of general supplies. Acuity mitigates this risk by increasing stock levels beyond industry standards to account for delayed delivery in stock replenishment. Acuity's Supply Chain and Property Management services keep supplies moving and facilities stocked when suppliers cannot deliver or local mandates threaten access to necessary goods

Tactical IT & Communications Support

Acuity's Tactical IT & Communications support services include setting up and managing IT infrastructure and communication systems in high-threat and austere environments, including military bases, forward-operating stations, and critical commercial facilities. We use a combination of human expertise and innovative technologies to enhance situational awareness, mission-readiness, and operational success.

Expeditionary Construction Services

Acuity delivers high-quality construction projects under challenging conditions, ensuring you can establish operational capabilities quickly and effectively. Acuity's experienced team is equipped to handle all phases of construction, from site preparation and logistics to the assembly of temporary or permanent structures. We focus on speed, safety, and quality while providing reliable support and delivering projects on time and on budget.

Airfield Operations & Management

Acuity's Aircraft Rescue and Firefighting services ensure the highest quality of safety and preparedness for aircraft and personnel operating on airfields. Our specialized firefighting and emergency response teams are equipped with state-of-the-art vehicles and equipment and are trained to handle a wide range of aviation-related accidents—rapidly and effectively. We also offer comprehensive airfield maintenance services and inspections, repairs, and rehabilitation work to ensure the safety of airfield infrastructure.

Civil Engineering Services

Acuity's comprehensive range of civil engineering services are tailored to meet the needs of the public and private sector. We specialize in sustainable site development, infrastructure design, and water resources engineering. Our experienced team conducts environmental assessments and geotechnical analysis. Their commitment to innovation and sustainability allows them to deliver customized solutions that improve infrastructure and foster the wellbeing of surrounding communities.

Turnkey Life Support Services

Acuity's Turnkey Life Support services simplify complex projects and ensure seamless execution from start to finish. Our team creates tailored facilities that meet your unique requirements, and we handle everything, including initial design, construction, ongoing maintenance, procurement, and commissioning. We offer rapid deployment, cost-effective results, and an unmatched commitment to quality and safety—all while giving you a hassle-free experience that meets your strategic goals.

Facilities & Base Infrastructure Operations, Maintenance, and Repair (OM&R)

Acuity's OM&R services ensure continuous functionality and efficiency of infrastructure systems, including utilities (e.g., power and water), sewage treatment plants, airfield operations and maintenance, and dining and housing facilities. Our team uses specialized technology and program management practices to rapidly deploy and manage services rapidly—even in high-threat or complex environments—ensuring your mission success and operational readiness.

Medical Clinics/Trauma Centers

Acuity's emergency, trauma response, and routine medical care services and specialized treatments ensure the health and safety of all personnel. Our facilities incorporate advanced medical technologies and telemedicine capabilities to provide continuous care even in remote or high-risk areas. We offer customized care plans that align with your unique operational and environmental concerns.

Why Choose Acuity International

Rapid Deployment and Efficiency

- Quick mobilization for rapid deployments.
- Efficient project management, ensuring deadlines are met.
- Minimized downtime with expert facilities maintenance.
- On-demand response teams for any operational requirement.

Integrated Life Support Solutions

- Comprehensive life support for personnel, including housing and medical care.
- Fully equipped trauma centers and medical clinics for critical environments.
- Sustainably managed facilities and infrastructure.
- The very best customer care and technical services.

Advanced Engineering and Construction

- Civil engineering services designed for complex environments.
- Rapid expeditionary construction capabilities in remote areas.
- Full-spectrum infrastructure management for both military and civilian needs.
- High-standard construction with a focus on safety and durability.

Who We Are

Acuity International brings clarity to complexity by aligning global expertise, resources, and innovation to provide governments with the tools and resources required to protect citizens, improve livelihoods, and build back communities—any time, any situation, any environment.

We work closely with federal, state, and local governments around the world to build safe, secure, healthy and thriving communities. We are a single source for healthcare, humanitarian, disaster and emergency response, and security operations in all corners of the globe.

Acuity's global team of experts is ready to provide base operations services tailored to your needs. Whether you require construction, supply chain, or infrastructure and operations management or health services, Acuity International offers comprehensive programs to ensure your facilities are built and deployed rapidly and run without interruptions.

Please contact us today to learn more about how we can manage your base operations and provide tailored solutions to meet your needs.
