Environmental Remediation

Eliminating hazards and restoring safety to communities.

ACTIONS WITH PURPOSE, RESULTS THAT MATTER.

Introduction

Disasters, armed conflicts, and industrial accidents can result in significant environmental devastation, leaving behind degraded ecosystems, contaminated sites, and threats from munitions, mines, and explosives. These hazards jeopardize human life, community safety, and land use. Effective environmental remediation, along with proper munitions management and demilitarization, is essential to mitigate these risks and ensure compliance with national and international regulations.

Acuity International's Environmental Remediation Services are designed to meet these challenges head-on, providing expert remediation of unexploded ordnance, munitions, Chemical, Biological, Radiological, Nuclear, and Explosives (CBRNE) threats, and environmental hazards worldwide.

Our experts are dedicated to eliminating hazards and restoring safety, economic recovery, and sustainability to communities. They detect, respond to, and remediate threats posed by munitions, explosives, mines, and hazardous materials – ensuring compliance with regulations. Additionally, they focus on building local capacity and expertise, fostering stability, long-term safety, and operational readiness for the future.

It's all part of Acuity's mission to drive profound impact and build safe, secure, sustainable, and thriving communities in all corners of the world.

The Acuity Advantage

Acuity International's comprehensive Environment Remediation services mix unparalleled expertise and innovative technology. We address the unique challenges associated with munitions response, demilitarization services, and land contamination, including clearance and remediation of explosive hazards and associated environmental concerns.

Our personnel have experience working in a variety of site conditions, including terrestrial and underwater, urban, and austere locations. They are field-tested in every aspect of remediating threats from unexploded ordnance, munitions, CBRNE, and environmental hazards worldwide.

With Acuity International safely and cost-effectively handling the complexities of management, detection, and remediation services, you can concentrate on making a meaningful impact in the communities and regions impacted by conflict, environmental disasters, and military operations. We help you ensure the safety of these communities and regions, promote recovery, and foster sustainable development for a brighter future.

Our Services

Munitions, Explosives Management, and Demilitarization

Safely detecting and disposing of UXO protects lives and property and enables safe land use, promoting economic recovery and community safety. We provide comprehensive management, detection, and remediation services for unexploded ordnance (UXO) and explosive remnants of war (ERW), ensuring safe disposal and demilitarization in compliance with International Mine Action Standards (IMAS).

Improvised Explosive Device (IED) Defeat and CBRNE Response

Threats from IEDs and CBRNE can cause mass casualties, disrupt infrastructure, and create long-term health and environmental risks. Our specialized response capabilities neutralize IEDs and effectively assess, respond to, diagnose, and remediate complex CBRNE hazards.

Military Munitions Construction Support and Range Sustainment

Effective UXO risk management ensures safety, operational readiness, environmental protection, and regulatory compliance in construction projects. We provide comprehensive military munitions support and range sustainment services, guaranteeing safe handling and adherence to environmental standards at active training and operational sites.

Demining and Mine Action Compliance

Clearing minefields to enable safe land use and development is a critical humanitarian and environmental effort that promotes safety, economic recovery, and sustainable development in post-conflict areas. We provide IMAS-compliant demining services and expertise, supporting global mine action initiatives aimed at clearing land and restoring safe, productive environments for communities affected by landmines and explosive hazards.

Training, Capacity Building, and Curriculum Development

Well-trained personnel are better prepared to respond to explosive hazards, promote stability in post-conflict areas, and reduce reliance on external assistance. We provide specialized training programs for military and civilian personnel that build local capacity and expertise in explosive ordnance disposal (EOD), demining, and munitions management, ensuring sustainable long-term safety and operational readiness.

Comprehensive Environmental Assessment, Remediation, and Hazardous Waste Management

Environmental hazards threaten human health, regulatory compliance, and land usability. Our experts identify contamination, assess risks, and develop custom remediation strategies. We expertly manage and safely dispose of hazardous materials using advanced technologies to remediate contaminated soil and groundwater. This comprehensive approach ensures compliance with environmental regulations and restores land and water resources for safe future use.

Environmental Compliance, Risk Mitigation, and Sustainable Restoration

We provide expert guidance to ensure compliance with local, state, and federal environmental regulations that safeguard communities from pollutants and hazards. Our services help organizations mitigate risks, protect public health, and reduce liabilities. We promote long-term environmental health and resilience for communities and ecosystems by focusing on sustainable land rehabilitation and ecological restoration.

Why Choose Acuity International

Global Leader in Hazardous Remediation

- Over 30 years of experience in UXO and CBRNE remediation.
- Successfully cleared explosive hazards in over 50 countries.
- Certified experts adhering to international safety standards (ISO 9001:20015-certified, and CERCLA, RCRA, MMRP, and IMAS compliant)
- Trusted partner of governments and international organizations.

Comprehensive Munitions Management

- End-to-end solutions from detection to disposal.
- Advanced technologies for safe and efficient operations.
- Customized strategies for unique site conditions.
- Integration of environmental restoration practice.

Compliance & Accreditation

- ISO 9001:2015 Quality Management Systems
- Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)
- Resource Conservation and Recovery Act (RCRA)
- Military Munitions Response Program (MMRP)
- International Mine Action Standards (IMAS)

Who We Are

Acuity International brings clarity to complexity by aligning global expertise, resources, and innovation to provide governments with the tools and resources required to protect citizens, improve livelihoods, and build back communities—any time, any situation, any environment.

We work closely with federal, state, and local governments around the world to build safe, secure, healthy and thriving communities. We are a single source for environmental remediation, healthcare, humanitarian, disaster and emergency response, and security operations in all corners of the globe.

With over 30 years of experience, our teams have cleared 1.2 billion square meters of explosive hazards and demilitarized over 90,000 tons of munitions in 30+ countries. We serve clients such as the U.S. Department of Defense, foreign governments, and humanitarian organizations, addressing munitions response, hazard clearance, and environmental remediation.
